

Unified PAM **MSP Edition**

Industry-first Unified PAM Truly Purpose-built for MSPs

Offer PAM-as-a-Service across diverse client environments with complete operational flexibility.

Unified privileged
access governance

Scalable multi-tenant
architecture

Complete operational
flexibility

One package to manage privileged access for multiple clients

Truly Unified

✔ Password Management

Discover and consolidate all types of privileged identities under one roof. Create and enforce password policies. Automate periodic password resets on client networks.

✔ Privileged Session Recording

Monitor live sessions to assist end-users and terminate the connection if required. Record sessions along with the corresponding keystroke activities for forensic analysis.

✔ Just-in-time Remote Access

Launch RDP, SSH, and SQL connections to remote assets within your native network and assets in the client network. Implement approval workflows and provide access without revealing the credentials.

✔ Endpoint Privilege Management

Eliminate local admin rights on endpoints across MSP and client environments. Allow MSP technicians and client-side IT teams to only operate with standard user privileges.

Truly Purpose-built for MSPs

✔ PAM-as-a-Service

Provide PAM as a service and reduce infrastructure costs for your clients. Capitalize on the fully outsourced or co-managed IT model to generate recurring revenue streams.

✔ Diverse Infrastructure Support

Stay agile with the ability to manage privileged access for on-prem, multi-cloud, and hybrid IT set ups, both in the client and MSP environments.

✔ Administrative Flexibility

Gain flexibility to manage various MSP deployment models. Govern client access holistically from a single instance or offer PAM as a service to clients.

✔ Scalable Multi-tenant Architecture

Manage privileged access for tens of hundreds of clients from a single instance. Achieve centralized controls with well-defined access restrictions.

Personalized Demo

Do you want to see if Securden satisfies your requirements? Leave your contact information and a Securden technical expert will schedule a personalized online demo for you.
