- One-click RDP, SSH, SQL and web app access without password disclosure
- Full session recording with video playback PAM

Machine Identity Mgmt

- Windows domain, service and local account management PAM
- Runtime secrets via CI/CD, CLI and SDKs; SSH key tracking and mapping

Audit & Reporting

- Access, change and approval audit trails with SIEM integration
- Built-in and custom reports; ticketing system integration PAM

Built on
 Zero Trust

AES-256 encryption
 at rest and end-to-end
 SSL/TLS protection

Unique encryption key
 per installation, stored
 separately from data

High availability,
 database backups and
 fast disaster recovery

Flexible Deployment

On-premises, SaaS, or private cloud,
 with four editions to choose from.

Access Anywhere

Web, mobile, and browser
 access, including offline use.

Fit Your Tech Stack

Integrates with your identity,
 MFA, and SIEM tools.

One of the many things we love about Securden Password Vault is the amazing access control features.
